

NEARMAP'S FIRST DECADE.

- Specialize in high-resolution aerial imagery delivered via cloud
- Regularly capture 71% of the U.S. (430 largest urban areas)
- Used within several key industries Government, AEC, Real Estate,
 Insurance, Utilities, Telecom, Solar/Roofing/Paving
- 8,500+ Customers
- 87,000+ Users accessing imagery regularly
- We've taken 60M individual photos 1 petabyte of storage
- Recognized by Esri as Best New Content Partner 2017

WHAT MAKES NEARMAP DIFFERENT?

We capture, manage, and deliver current, consistent location content faster than anyone.

WHAT MAKES NEARMAP DIFFERENT?

CURRENT Photomaps of U.S. urbanized areas are updated frequently

CLEAR Nearmap imagery is sub-3" GSD, which is several times sharper than free satellite imagery

CHANGE All historical captures are maintained for easy change detection and analysis

CLOUD-BASED HD aerial maps are accessible instantly through the cloud

CONSISTENT All forms of Nearmap imagery are provided at the same specs across all locations

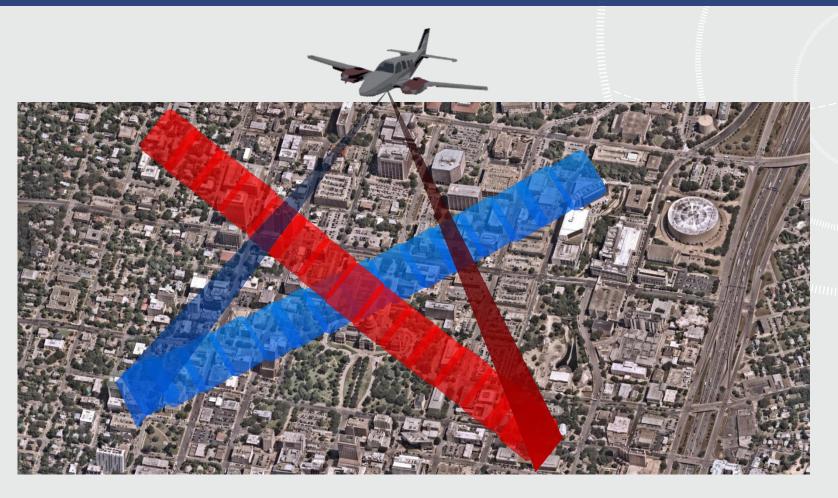

NEARMAP HYPERCAMERA.

Vertical and 4-way oblique imaging system

HOW NEARMAP CREATES AERIAL MAPS.

FAST AERIAL SURVEY OF LARGE AREAS

- Patented HyperCamera
- Collects large areas
- All imagery is high-res (Sub-3" GSD)

SCALABLE CLOUD-BASED IMAGERY PROCESSING

- Patented processing
- Publishes within days
- Identifies triangulation points
- Creates DEM
- Ortho-rectifies images
- Uninterrupted mosaic

DESKTOP-READY DATA SUPPORTING BUSINESS NEEDS

- Instant access
- Industry-leading cloud service
- Accessible via MapBrowser
- Integrates with GIS, CAD
- 3rd party applications

NEARMAP HD LOCATION CONTENT.

VERTICAL

- High-res top-down i.e. "ortho" imagery
- Measure line, area, or radius
- Overlay roads
- Smooth, uninterrupted pan & zoom
- Seamless integration with GIS & CAD apps

PANORAMA

- Multi-perspective aerial views
- View images from four cardinal directions
- Smooth, uninterrupted pan & zoom
- Mosaic allows for continuous view without "geo-fencing"

OBLIQUE

- Multi-perspective aerial views
- View as mosaic or access individual source images
- Accurate measurement of height

DSM & 3D

- Highly accurate Digital Surface Models
- 3D point cloud and mesh

TOP USES.

Explore Your Environment with ease, clarity and minimal impact

Unlock Opportunities to make more informed decisions

Transform the Way You Work into a productive, strategic advantage

CUSTOMER CASE STUDIES

CASE STUDY: MOMENTUM SOLAR.

PAIN POINTS

- Rapid expansion –
 Nationwide
- Inconsistent, low-res satellite imagery
- Constrained views no seasonal change

SOLUTION

- Timely imagery = speed and accuracy
- Complete virtual solution drives customer sat
- Immediate opportunity qualification

IMPACT

- Proposal development: 2 weeks to 2 days
- Leaf-on, Leaf-off: precise lead qualification
- Accurate measurements: 3-4 times faster panel placement proposal

SPEED TO MARKET

1,000 to 3,000 additional homes qualified per week

CASE STUDY: CITY OF APEX, NC

PAIN POINTS

- Hyper-growth required efficient planning
- Out of date, low resolution imagery
- Massive state reimbursements hang in balance

SOLUTION

- Current imagery inside ArcGIS™
- Accurate measurements without "wheel-walking"
- "Powell-Bill" Reporting to state

IMPACT

- Dramatic reduction in site visits
- Rapid response to staff and citizen requests
- Support all government departments

\$1.4 Million

Reimbursed from North Carolina

CASE STUDY: HYRDOMAX USA

PAIN POINTS

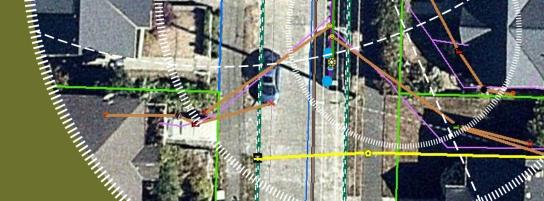

- Low resolution, inconsistent satellite imagery
- Location accuracy was low
- High risk projects

SOLUTION

- Clear feature detection
- Scalable solution: Video data, Esri® and Nearmap
- Integrated into work processes

IMPACT

- Efficient resource deployment
- Improved customer service
- Scalable business growth

Dramatic Risk Reduction

With improved analysis
